

PRNET Software Releases New Version of its Inventory System, E-Stock

Montevideo — 04/10/2009 — PRNET Software today announced it will launch a new version of its application, **PRNET Software**, which works with Microsoft Windows® 7 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. **E-Stock is a Inventory software for products management and products expirations. The benefits of the software also include: multi-deposit, multi-user, customizable and easy to use user interface.**

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“**PRNET Software** is excited to launch this new version of **E-Stock**,” said **Pablo Ramírez, Director** at **PRNET Software**. “Making our application compatible with Microsoft Windows 7 helps us offer our customers compelling benefits, including: improved security and reliability features, advanced graphic hardware acceleration, full support for multi-core processing, intelligent power management”

E-Stock is the most easy to use Inventory System in the market. The software has been designed to advise you in advance, if any of your goods have date of expiration or if exists products that are under the minimum stock. E-Stock gives you a complete report of your inventory movements.

PRNET Software is a leader company in the software development for Small Bussines, as well as computer solutions in accordance with the needs of our clients.
